Step 1.

Choose create a New Solution, Project or Application

Even though you're creating an IP Data Manager dll choose the Application option (as at version C10.0.12104 the Ip Data Manager DLL option does not appear to work)

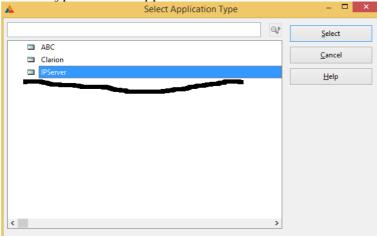

New Solution, Project or Application							
Categories: Clarion for Windows Clarion.Net SharpDevelop	Application Application IP Data Win32 DLL Win32 EXE Win32 EXE Win32 EXE with a Win Library						
Appgen Application							
Name: testcreate							
Location: S:\Clarion10	Location: S:\Clarion10\Examples\IPDriver\File Transfer						
New Project Name: testcreate	Project Name: testcreate						
Auto create project subdir Project will be created at S:\Clarion10\Examples\IPDriver\File Transfer							
	Create Cancel						

## Step 2.

When the application properties window appears, click on the Templates, Application lookup button.

Application Properties			
Application File:	testcreate.app		
Dictionary File:	S:\Clarion10\Examples\IPDriver\People\people.DCT		
First <u>P</u> rocedure:	Main		
D <u>e</u> stination Type:	Executable (.EXE)		
He <u>l</u> p File:			
Templates			
Application:	ABC		
<u>T</u> oDo:	ToDo(ABC)		
(	Application Wizard		
	OK Cancel		

## Step 3. When the select application type window appears choose/select IP Server.

## Step 4.

Choosing the project options for this project make sure that the output type is DLL

estcreate.ap	p te	stcreate* ×				
pplication	Compil	ing Debug	Build	Events		
Configurati	ion:	Debug	~	Platform:	Win32	~
Select the n	nenu opt	tion Build / S	et Confi	guration to ch	ange the Build t	arget
Target Nam	ie:					
<ul> <li>testcreation</li> </ul>						
Output Patł	n:					
Output type	2:				Link Mode:

Project Inf	ormatio	n				
Project	Folder:	S:\Clarion10\Examples\IPDriver\File Transfer				
Proj	ect File:	testcreate.	cwproj			
Output	t Name:	testcreate.l	DII			

## **Global Extensions**

Don't forget that there may be some global extensions available. The IPDRVExtebdedServerGlobal allows you to open up many more capabilities of the IP Data Manager

A Select Extension	– 🗆 🗙
Class cwVersionRes - Version Resource	Select
<ul> <li>cwVersionRes - Version Resource</li> <li>Class fm3 - CapeSoft File Manager 3 - Version5.30</li> <li>ActivateFileManager3 - Activate CapeSoft File Manager 3 - Version:5.30</li> <li>Class IPServer - IPServer Templates (V2.3)</li> <li>IPDRVExtendedServerGlobal - IPDRV Extended - Global</li> <li>Class IPServerInMemoryCachedTable - Softvelocity In-MemoryCachedTable</li> </ul>	<u>C</u> ancel <u>H</u> elp
InMemoryCachedTableSupport - In-Memory Data Caching support
